Continuation Sheet (PTO-303) 09/764,766

Application No.

Continuation of 2. NOTE: Applicant fails to incorporate all limitations of intervening claims, hence "second phase windings" (claim 72) and "second phases" (claim 74) lack antecedent basis. Also, "...said rotor of said shaft, output of said probes..." (claim 72) is a comma splice. The issues raised in the 112 rejection of claims 67-86 have not been solved since it is still not clear in claim 72---if the actuator is combined with the motor----whether the first and second phase windings are part of the motor's "first set of windings" or if they are separate, actuator windings; and further in claims 76-78, whether "windings" refers to the motor's "first set of windings" or to the actuator's "first and second phase windings," or both. In short, it is not clear if the actuator "first and second phase windings" are the motor's "first set of windings" or not.
